

## Professional Compliance is the rule of thumb with Nordic Backup.

To satisfy today's mandatory compliance issues involving the storage and security of client records and data, Nordic Backup provides powerful and cost-effective solutions.

We automatically protect your critical and confidential data by providing secure online backup, storage and restoration that eliminates the threat of human error, natural disaster or mechanical or software failure.

Nordic Backup allows you reduce IT expenses and get rid of difficult and unreliable tape backups by backing up your critical data to our secure and geographically separate data centers.

### ***Nordic Backup is compliant with the following regulatory mandates:***

- Health Insurance Portability and Accountability Act (HIPAA)
- Sarbanes-Oxley Act (SOX)
- Graham-Leach Bliley Act (GLBA)
- Financial Industry Regulatory Authority (FINRA)
- Securities Exchange Commission (SEC) Compliance

### ***Nordic Backup's secure, online backup solutions offer these critical compliance features:***

- Automatic verification of the quality and accuracy of the data set every time a backup takes place.
- Backup data is encrypted using 256-bit AES encryption before transmission and is always maintained in encrypted state until restored to client servers.
- Data can be stored on Nordic Backup's secure servers indefinitely. Retention periods are configured by users during initial set up, after that, backups are automatically stored for that period and can be deleted automatically after the period stated in each Act (generally, five years).
- Data access is restricted to authorized personnel with a self-created encryption passphrase only known to the user.
- Fully automated backups scheduled by the user and daily verification and notification that every backup has completed successfully.
- Data is stored offsite in redundant, high security Data Centers and data can be restored to any location 24/7.
- Customer service is available around the clock. Daily backup audits and confirmation e-mails with summary transfer logs ensure the integrity of every single data backup set to provide a clear audit trail if necessary.
